

TRINITY COACH ACCESS

Helping you manage your coaching partnership and create outstanding results.

ADDING VALUE

For coaches, Trinity will support your coaching partnership, providing a detailed record of your coaching sessions, both past and present and a secure communication link with your clients, allowing you to track their results around your coaching conversations. There are resources you can ask your clients to complete such as the 'End of Week Review', which not only guides your client's thinking in the right direction, but also provides you with valuable feedback as to how each client is progressing. There are also assignments, experiments and 360 degree feedback questionnaires available to both you as a coach and to your clients.

COACHING JOURNAL

Helps you manage your session bookings online and provides a coaching journal to track your clients' notes, as well as your own private notes for each session. Trinity provides an easy billing system allowing you to manage your fee structure. Clients can purchase a block of Coaching Units up front and choose to use these on meetings or telephone coaching sessions. You can agree a different rate for meetings and coaching calls allowing you to provide better support to your clients. This also makes it more visible for the client allowing them to purchase Top Up units when required.

VALUABLE INSIGHTS

Monitor your client's use of the MindLab area. The 'End of Week Review' provides valuable insights about how your client has been and the issues they are facing, providing essential details about areas for you to focus on in your coaching sessions. This also provides a record of your client's activities between sessions eliminating the need during the session to catch up on their progress, giving you more time to work on their desired outcomes.

TRACK YOUR CLIENTS PROGRESS

The Outcome Tracker provides a view of all of your clients' outcomes with the status of each, allowing you to see at a glance which clients may need help and support.

COACHING INFORMATION

By allowing you to view your clients' Core Ideology and Roles, Trinity provides additional information and material for you to work on within your coaching sessions.

ONLINE 360 FEEDBACK TOOLS

Trinity enables you to monitor results of 360 feedback, providing more information on what areas your client needs to improve and helps you assess the results from your coaching.
